DETAILED ACTION

1. The informal drawings filed on 21 November 2003 are objected to for the reasons indicated in parent application 09/981,103. Formal drawings are required in response to this action in order to avoid abandonment of the application.
2. The disclosure is objected to because of the following informalities: On page 14, line 13, "leftward" should be –rightward--. On page 14, line 14, "rightward" should be "leftward".

Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al. See Figure 1 of Takahashi et al for a "check valve" function. See Figure 6 of Takahashi et al for an "anti-cavitation" function. See Figure 4 of Takahashi et al for a "pressure relief" function.

5. Claims 8-11 are further rejected under 35 U.S.C. 102(b) as being anticipated by Stacey. Valve 43 of Stacey is read as a "check valve". See column 5, lines 10-18 of Stacey for an "anti-cavitation" function. See column 4, lines 26-45 of Stacey for a "pressure relief" function.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 8-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,581,639. Although the conflicting claims are not identical, they are not patentably distinct from each other because they do not support separate patents. Claims 8-16 herein are readable on the embodiments claimed in claims 1-21 of Fiala et al, and claims 1-21 of Fiala et al are readable on the embodiments claimed in claims 8-16 herein.
